Demonstration Peach Orchard

100 TREES FOR ONLY \$11.99

Your choice of Belle of Georgia, Elberta, J. H. Hale, Carman, Heath Cling, Hiley, Krummcl: 5/16 to 7/16 in. in diameter, 2 1/2 to 4 ft. high.

Do not confuse these with prices quoted by others on trees graded by height. We measured 100 of our Elberta 5 1/16 in. and found 78 were 3 to 4 ft. and 22 were 4 ft. up. The Belle of Georgia are taller growing, but the J. H. Hale are shorter. Anyway, it is what you have left after pruning that counts.

250 for \$24.00

Same choice of varieties—same good quality as above.

500 for \$40.00

Same varieties and quality as above. A real offer.

To the left is shown a bundle of 10 Elberta Peach trees—1 yr. size, 5 1/16" to 7 1/16" diameter, 2 1/2 to 4 ft. tall. Note the fine roots and tops.

It is not at all hard to have fine, abundant bearing peach trees like this one shown to the right on J. L. Taylor's farm at Chanute, Kansas. He is another of the thousands of satisfied Neosho customers.

"I purchased many of the trees I planted on my own farm from the Neosho Nursery, and got wonderful results. Especially, just now, we have a five-acre cherry orchard, two years old, with a growth as uniform and vigorous as any I have ever seen. I think every tree lived and they are making a very fine growth. I also bought plum and peach trees from the Neosho Nursery with fine results."—J. S. Malone, County Agent.

RICHARED—the Delicious Supreme

Richared Delicious Apples are a distinct variation, possessing all the good qualities of flavor, texture, size and shape of the popular Delicious, to which is added a rich, solid, double-red color which greatly increases its attractiveness and market value.

The Richared is solid red and is not striped like the ordinary Delicious. Practically all apples on Richared trees "color extra fancy". The Richared colors early and is a rich red before it ripens and, fully two weeks ahead of the common Delicious, is ready to be picked and go to the highest market.

On account of being able to pick early, while the apples are a hard ripe, the Richared is a long keeper and may be kept in cold storage until the following summer.

More extra fancy grade—early picking—firmer apples—no loss from windfalls—and long storage are the profit features of this variety. Richared Delicious is now bearing on third generation trees and they are identical with the parent tree.
